AZHEN BIZHAR NOORI

Computer Science – Cyber Security

Email: azhen20019@outlook.com **Phone:** +964 751 704 4506

EDUCATION

B.Sc. Computer Science, Cybersecurity
University of Kurdistan Hewlêr | *2026*

SKILLS

Technical Skills

- Networking Fundamentals
- VLANs, ACLs, NAT & Routing
- Cisco Packet Tracer
- TCP/IP & Subnetting
- Python
- SQL
- Cybersecurity Fundamentals
- Digital Forensics

Professional Skills

- Business Development
- Company & Market Research
- Client / Company Communication
- Stakeholder Coordination
- Microsoft Excel & Google Sheets
- Data Entry & Record Management
- Proposal & Business Email Drafting
- Event / Participant Coordination

EXPERIENCE

Business Development Specialist
BIP Summit, Bridge Investment Platform | *Erbil, Iraq* | *September 2026 to October 2026*

- Conduct company and market research to identify potential business, investment, partnership, and sponsorship opportunities.
- Communicate with local and international companies regarding participation in BIP Summit and collect company, representative, and participation information.
- Prepare and organize company profiles, participant databases, speaker and attendee records, and business-development lead lists using Excel and Google Sheets.
- Support the preparation of proposals, partnership documents, sponsorship materials, and MoUs for participating companies and partners.
- Coordinate participant requirements, including passport information, visa needs, accommodation, transportation, and travel arrangements.
- Research companies and sectors to support B2B matchmaking between businesses, investors, partners, and institutions.

Marketing & Product Representative / Student Intern
Standing Tech | *August 2025 to October 2025*

- Represented Standing Tech by communicating with visitors, explaining products, and supporting brand presentation.
- Assisted with marketing activities and product promotion.
- Developed professional communication, teamwork, and problem-solving skills in a real business environment.
- Gained experience in customer interaction, project coordination, and product presentation.
- Applied basic UI and web interface knowledge when discussing digital products and services.

PROJECTS

AI-Generated Image Detection System: Developed a cybersecurity-related image authenticity tool using Python, Streamlit, PyTorch, and digital forensic techniques. The system analyzes uploaded images using CNN prediction, metadata analysis, noise analysis, ELA, frequency analysis, edge detection, and Grad-CAM visualization.

Cloud Security and IAM Policy Testing: Worked on cloud security scenarios involving Identity and Access Management policies, explicit deny, implicit deny, access control, cloud service models, virtualization, snapshots, and secure configuration.

Cisco Networking Projects: Designed and configured secure networks using VLANs, ACLs, NAT, routing, and DHCP with Cisco Packet Tracer. Practiced network segmentation, traffic control, and troubleshooting.

Web Scraping and Machine Learning Project: Built a Python-based web scraping and machine learning project using real-world book data. Applied regression, classification, clustering, and neural network models to analyze and predict data patterns.
